About Conference

11th International Conference on Ethics, Humanities and Social Science (ICEHSS-2022)

During the worldwide lockdown due to COVID 19 pandemic, a lot of important activities have come to a halt. However, when we look at the brighter side, all of us have more time for adding to our knowledge and insights.

With this aim, to keep contributing to learning and motivation International research and development Center for publication is going to organize a two-day International Conference with the title “**11th International Conference on Ethics, Humanities and Social Science (ICEHSS-2022)**” on Jun 24-25, 2022 through online mode.

We hope, this online mode of the conference in covid-19 pandemic will be an appreciable step in promoting the research activities and new information between researchers, developers, students, academicians and practitioners working in and around the world by keeping the social distance in view to stop the spread of COVID-19 disease. This conference aims is to present the current researches being carried out in the field of social science and education development around the globe.

Prospective authors from academia as well as industry are invited to submit their abstracts that illustrate original/unpublished works and industrial applications describing advances and significant innovations in the field.

Abstract— This article focuses on documenting through the state of the art the management of public policies in Colombia, in relation to the ethics of government during the years 2002 to 2018. Through documentary research, with a qualitative approach and descriptive scope, using as a technique the content analysis, and variables such as governance and ethics developed from the practice of some governors related to figures on corruption from the accounting and financial field. The result is that public policy on taxes, good governance and infrastructure differs depending on the level of development of the country and the government in power, since the resources available to cover social, financial, administrative, and public needs are "scarce", considering the measures of governance of the country and the degree of corruption.
