The IRDCP has a steadfast commitment be the fulcrum of the ocean of knowledge around which efforts of researchers move about.

## *About Conference*

### *3<sup>rd</sup> International Conference on Sociology And Methodology* *(ICSM-2022)*

During the worldwide lockdown due to COVID 19 pandemic, a lot of important activities have come to a halt. However, when we look at the brighter side, all of us have more time for adding to our knowledge and insights.

With this aim, to keep contributing to learning and motivation International research and development Center for publication is going to organize a two-day International Conference with the title **3rd International Conference on Sociology And Methodology (ICSM-2022)** on Nov 24-25, 2022.

We hope, this online mode of the conference in COVID-19 pandemic will be an appreciable step in promoting the research activities and new information between researchers, developers, students, academicians and practitioners working in and around the world by keeping the social distance in view to stop the spread of COVID-19 disease. This conference aims is to present the current researches being carried out in the field of social science and education development around the globe.

Prospective authors from academia as well as industry are invited to submit their abstracts that illustrate original/unpublished works and industrial applications describing advances and significant innovations in the field.

**Abstract**— Digital nomadism is often considered an extremely mobile form of digital work: one of the flexible working alternative that characterizes the information society and where workers simultaneously benefit from a spatial mobility (choosing where to work) and a temporal mobility (deciding when to work). With this paper is our intention to reveal the geography of the global mobility of digital nomadism in order to identify which tourist locations are taking more advantages from this flexible working alternative; also to determine the main factors pondered by digital nomads when choosing their next work destination; as well as to draw the profile of digital nomads and their most common practices while on the move. Methodologically this study crosses both quantitative-qualitative research techniques, as it explores statistic data collected and systematized from telematic online platforms used by the digital nomads community, complemented with the main results of a content analysis based on a set of 42 in-depth firsthand interviews with digital nomads.

**Keywords**— digital nomadism, e-work, flexible work, migration studies, research online methodologies
